FRONT END DEVELOPER

Results-driven **Frontend Engineer** with **4+** years of experience designing, architecting, and optimizing scalable **React-based web applications** in enterprise environments. Proven expertise in **component architecture**, **state management (Redux Toolkit, Context API)**, **performance engineering (memoization, code splitting, lazy loading)**, and **REST API integration**. Experienced in leading **UI modernization initiatives**, transforming legacy systems into modular, maintainable platforms, and delivering high-performance, **accessible (a11y-compliant)** user-centric interfaces that accelerate product development and improve business efficiency.

PROFESSIONAL EXPERIENCE

Front End Developer - Tata Consultancy Services

Jul 2023 - Present

- Architected and developed scalable **React-based enterprise modules** as part of a large-scale **legacy-to-modern platform transformation initiative**.
- Built modular, reusable **component systems** that reduced feature development turnaround time and improved long-term maintainability.
- Optimized rendering performance using **React.memo**, **useMemo**, and **useCallback** to prevent unnecessary re-renders in complex UI workflows.
- Delivered major **bundle-size optimizations** by implementing **lazy loading**, **Webpack code splitting**, and **asset restructuring**, reducing **initial entryptpoint size by ~59%** (5.90 MiB to 2.38 MiB) and improving **build time by ~72%** (165,704 ms to 44,983 ms), significantly enhancing load performance and developer productivity.
- Integrated and optimized **RESTful APIs** within React applications, ensuring efficient state synchronization and data consistency.
- Leveraged **Redux Toolkit** for centralized state management and **Context API** for scoped state handling to minimize prop drilling and enhance component reusability.
- Improved UI responsiveness by restructuring component hierarchies and refining dependency management in **React Hooks**.
- Ensured **accessibility (a11y) compliance** through **semantic HTML**, **ARIA roles**, keyboard navigation support, and focus management best practices.
- Contributed to **Backend-for-Frontend (Node.js + Express)** layer modifications, enabling seamless communication between UI and Java backend services.
- Conducted API validation and debugging using **Postman** and **Swagger**, reducing integration issues during releases.
- Supported **CI/CD automation via Jenkins**, ensuring stable builds and streamlined deployments.
- Deployed and monitored applications on **GCP Compute Engine VMs**, analyzing production logs through secure **SSH** access to diagnose and resolve issues efficiently.
- Collaborated cross-functionally with backend, QA, DevOps, and product stakeholders to ensure high-quality releases in **Agile environments**.
- Mentored team members on **UI architecture patterns**, **performance best practices**, and scalable project structuring.

Systems Engineer - Infosys Ltd

Aug 2021 - Apr 2023

- Experienced front-end developer skilled in **React, JavaScript, HTML, CSS, Redux Toolkit, Tailwind CSS, and Bootstrap**, with a strong focus on building scalable and responsive user interfaces.
- Possesses working knowledge of **PHP, Core Java, and MySQL**, enabling effective collaboration with backend systems and APIs.

SKILLS SUMMARY

Technical Skills

- **Frontend:** React.js, JavaScript (ES6+), Redux Toolkit, Context API, React Hooks (useEffect, useMemo, useCallback, useRef), React.memo, TailwindCSS, SCSS, Material UI, Bootstrap, HTML5, CSS3
- **Performance & Optimization:** Code Splitting, Lazy Loading (React.lazy), Memoization, Bundle Optimization, Lighthouse Debugging, Accessibility (a11y), Semantic HTML, ARIA
- **API & Backend Integration:** REST APIs, Node.js (BFF - Express.js), JWT Authentication, Client-side Session Management, Postman, Swagger
- **DevOps & Cloud:** Jenkins (CI/CD), Git, GCP (Compute Engine, VM Instances), SSH, Production Log Analysis
- **Tools:** Webpack, Environment Variables (.env), Chrome DevTools

PERSONAL PROJECTS

- **Invoice-CRUD** - ReactJs, Material UI, Framer motion, Bootstrap
 - Built a CRUD-based invoice management application with responsive UI and smooth animations - [Link](#)
- **Designo** - ReactJs, Pure CSS, Framer motion, Leaflet
 - Developed a UI-focused React application featuring custom CSS styling, Framer Motion animations, and interactive maps using Leaflet - [Link](#)

EDUCATION

College of Engineering Guindy, Anna University - B.E. Agricultural & Irrigation Engineering

Aug 2017 - Apr 2021
